ASiM™ Overview

- ✓ To date there is 85 user installations of Olivine Technology products across Kenya.
- ✓ ASiM™ is the only multi-site supply chain solution available that is tailored to meet SME needs.
- ✓ ASiM™ has the largest deployment of a networked solution for any single company in East and Central Africa.

ASiM™ automates sales and inventory management for firms with multiple sites, such as sales-vans, salesmen, road shows, shops, warehouses, etc. It integrates with accounting software and hence provides a highly attractive, multiple-site, unified sales, stocks, and financial management solution.

Solutions are provided for specific operations areas including:

- Fixed-site and/or mobile sales.
- Debtor management.
- Stocks/inventory management, including orders and stock-takes.
- Financial management i.e. integrated accounting solutions.

ASiM™ solves critical challenges related to data collection, transmission, report creation, analysis, reconciliation and operations controls.

Specifically, ASiM™ accomplishes the following goals:

- Automated dissemination and/or collection of information from individuals or organizations “*anytime, anywhere in the world*”.
 - Use phone (CDMA or GSM) and/or Internet technology.
 - Uninterrupted, offline performance in areas without power or network coverage.
 - Automatic synchronization and transmission of data instantly or upon restoration of phone or internet coverage.
- *Automated organization and reporting*: Instant and automatic organization of data into customized reports, which are accessible to users located anywhere in the world.
- *Built-in security structure*: Impenetrable restrictions and levels of access to the data and system.

Additional Benefits

- Cost savings

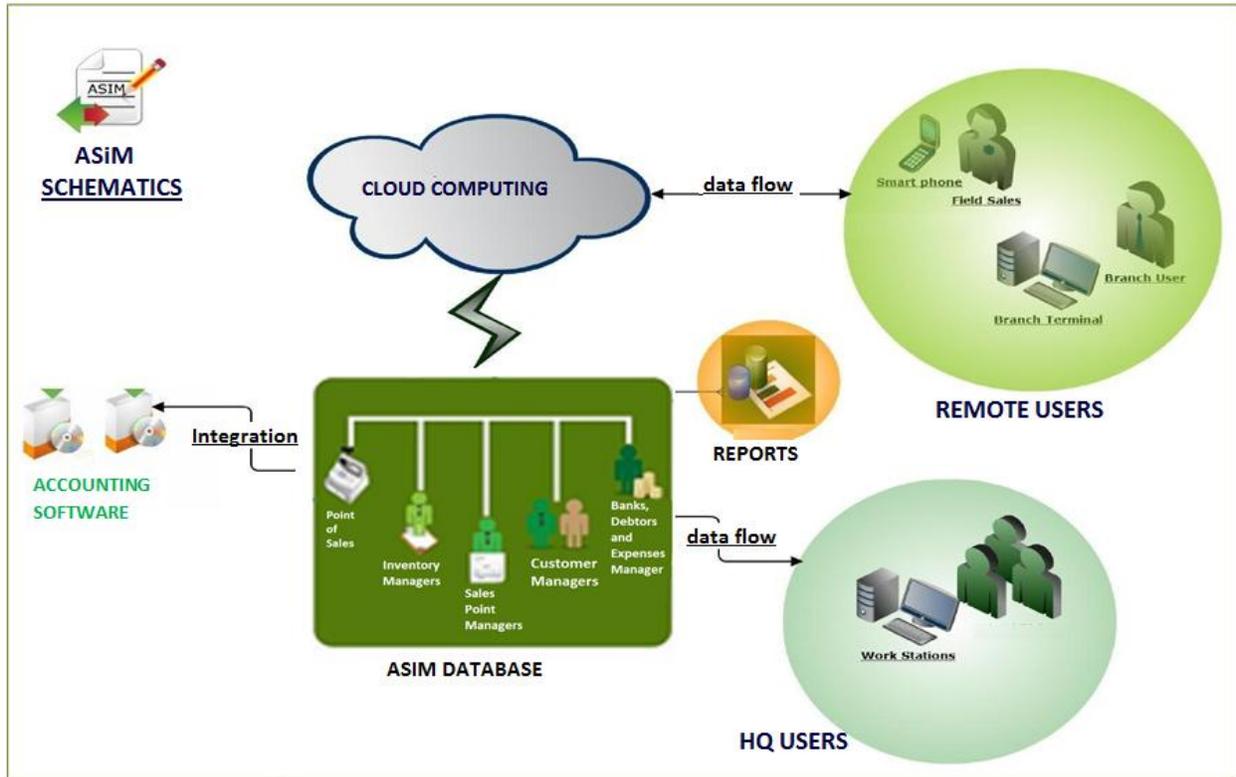

- Economies of scale due to lower marginal costs of service, particularly when you enjoy first-mover advantage using ASiM™.
- Reduction of paper material and shuttling costs.
- Increased productivity
 - Elimination of duplicative data entry.
 - Shift in focus from data entry to analysis.
 - Minimization of transcription errors.
 - Rapid work turnaround.
- Enhanced transparency, accountability, and control
- Competitive advantage and increased market penetration.
